

About Us

PetroCard

Headquartered in Kent, Washington, PetroCard, Inc. is primarily in the business of providing fuel and value-added fueling services to businesses operating a fleet of commercial vehicles. With more than 30 years of experience in the petroleum industry, PetroCard is a recognized lead in cardlock and mobile fueling.

Fleet Cards & Mobile Fueling

PetroCard offers the best from both cardlock and retail networks. Our card deck allows you to select from multiple cards that give you access to cardlock facilities and retail stations with the use of one card. Our cards give you the ability to help your fleet be more efficient and profitable. With our multiple fleet card options, we report all your fueling transactions on one consolidated invoice with access to our reporting tools and transactional data online.

Cardlock Network: Cardlocks are automated, open 24/7/365, unattended fueling sites designed for commercial fleet vehicles through the two largest cardlock networks, Pacific Pride and CFN. They have excellent accessibility for larger commercial trucks and are more convenient and efficient than retail fuel sites. These stations were designed for commercial trucks with their canopy size and turning radius to the station. PetroCard provides a wide range of solutions that help reduce unauthorized purchases and other security issues. You set the authorized controls for fuel types, locations and quantity restrictions for complete peace of mind.

Retail Cards: Our retail cards give your drivers coverage whenever they go. Our PrideComplete and Fleetwide retail cards gives access to Pacific Pride and CFN as well as the convenience of universal retail site coverage through WEX and Fuelman accepting locations.

CNG: Our brand Clean N' Green offers compressed natural gas through a retail chain of 15 + unattended fueling facilities nationwide. Please visit our website www.cleanngreenfuel.com for more information.

Mobile Fueling: PetroCard's mobile fueling service delivers diesel directly into your vehicles or equipment at your location during off-use hours. Mobile fueling increases productivity and profitability by eliminating non-productive labor and keeping your drivers behind the wheel, not at the fuel island. PetroCard offers 24-hours a day, seven days a week service and provides fuel whenever it is convenient for our customers. Our software provides detailed reporting and itemized billing through barcode scanning systems that records the type of fuel delivered to each vehicle.

Online Account Access Web Portal: PetroCard's custom software provides detailed reporting, itemized billing for all card purchases on one invoice and all the information you need to effectively manage your fleet. Download transaction details, fuel summary reports, tax reports and much more through Online Account Access.
